RULE THE SUN™

### Instructions for Adding Chain Length

The chain extender is provided with a joiner clip on one side. The length is based on double the required height because the chain is a loop.

- #1. Do not remove the shade from the brackets.
- #2. Operate the shade until the silver joiner is within easy reach. Note which side of the joiner moves up as the shade is raised. Disconnect the chain on the opposite side.
- #3. Connect the new chain into the existing joiner. Connect the other side of the old chain into the new joiner.
- #4. Operate the shade.
